Software Engineer

Full Stack Developer with 1 year of professional experience building scalable web applications and AI-powered systems. Experienced at CoalDev across React, Next.js, FastAPI, RAG systems and n8n automation. Adaptable across diverse tech stacks with a focus on clean, production-ready code.

WORK EXPERIENCE

CoalDev 07/2025 - 05/2026

Full Stack Developer

- Built internal Project Management Tool — task tracking, team dashboards, and progress reporting using React & FastAPI
- Implemented RAG (Retrieval-Augmented Generation) systems for AI-powered document Q&A; and chatbots
- Worked across React, Next.js, FastAPI stacks adapting to project needs; built n8n automation workflows

Devsarch 01/2025 - 03/2025

Web Development Intern

- Developed responsive web interfaces and frontend components; hands-on experience with HTML, CSS, JavaScript

DirAction 09/2024 - 11/2024

Coding Interview Trainer

- Taught problem-solving strategies, algorithm design, brute force techniques and solution optimization

EDUCATION

Bachelor of Computer Science

Superior University • GPA: 3.53/4.0

Lahore • 01/2020 - 09/2024

Intermediate ICS

Superior College

Renala Khurd • 01/2018 - 12/2020

CERTIFICATIONS

Python Project for Data Science

Coursera

01/2024

Python with Data Science, AI & Development

Coursera

11/2023

SQL

SoloLearn

01/2022

PROJECTS

Multi-Agent Forex Trading Bot

Built a multi-agent AI system using LangGraph for automated forex trading — agents handle market analysis, signal generation, and trade execution

Project Management Tool

Internal tool for CoalDev — kanban boards, task assignments, team roles, and real-time progress tracking

RAG System – AI Document Search

Built RAG pipeline for intelligent document Q&A; with vector embeddings and semantic search

n8n Workflow Automation

Automated multi-service workflows, reducing manual processes and improving team efficiency

Vehicle Showroom Web App

Feature-rich vehicle buying/selling platform with admin dashboard and user-friendly interface

Emotion-Based Music Recommendation

Detects user emotion via webcam and recommends music in real time using web APIs

SKILLS

Frontend: CSS3, HTML5, JavaScript, Next.js, React.js, Tailwind CSS, TypeScript

Backend: FastAPI, Node.js, Python, REST APIs

Databases: MongoDB, MySQL, PostgreSQL, Redis, Supabase

AI/Automation: LangChain, LangGraph, n8n Workflow Automation, NumPy, OpenCV, Pandas, RAG Systems

Tools: CI/CD, Git, GitHub, Postman
